The maximum monthly subsidy rates are based on a household's weekly participation hours in approved activities. The figures on this table represent full time participation of 32 to 40 hours per week. Parents who are participating less than 32 hours per week are paid at a lesser rate, depending upon the number of hours they are working and/or attending an approved training program. This table does not take into consideration the parent's income adjustment, which is based on the household size and income. The amounts above represent the maximum amount the State will pay. Parents are responsible to pay the difference between the subsidy amount and the amount charged by the provider.
